

PW90

ADVANCED HYGIENE FEATURES

DEEP-CLEAN MODE™

This feature automatically cleans the cold water reservoir, water lines and drip tray. **Deep-Clean Mode** is pre-programmed to activate when the system is not in use. It works by injecting a concentrated amount of activated oxygen into the cold water reservoir. That water is then automatically dispensed into the drain-connected drip tray, cleaning the system.

The **Deep-Clean Mode** is fully customizable, allowing control over the timing and frequency of cleaning, as well as the desired concentration of activated oxygen.

For more information about **Deep-Clean Mode**, including how to activate it, please contact PWT dealer technical support:

(855) 534-8332.

ADVANCED HYGIENE FEATURES

AUTO-CIRCULATION FRESHNESS CYCLE™

This feature automatically dispenses a programmed volume of water into the drain-connected drip tray after a predefined period of non-use. This cycle helps prevent stagnant water in the filters or lines. This feature is great for businesses with holiday breaks, schools with summer breaks, or any prolonged period of non-use.

The [Auto-Circulation Freshness Cycle](#) can be programmed to customize the desired duration of non-use prior to initiation of the cycle, as well as the volume of water dispensed.

For more information about [Auto-Circulation Freshness Cycle](#), including how to activate it, please contact PWT dealer technical support: (855) 534-8332.
